What is a universal car?

These are vehicles that are suitable for wheelchair users or that have been fitted with equipment to assist with getting in and out of the vehicle for people with mobility disabilities or elderly people. The words 'universal design' and 'rental car' were combined to give the name 'universal car'.

Important points

- We have these vehicles above available for rental in the 6 prefectures of Tohoku. However, there are occasions when we are unable to handle a request for one due to the number of them being limited.
- We don't have wheelchairs available for rental.
- Please call the branch you wish to use for reservations.

For further information regarding car sizes etc., please call the universal enquiry line
